Allowable Subject Matter

1. Claims 2-11 and 12-18 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art Vaidya (US Patent NO 6,279,113) of record discloses, a signature based dynamic network intrusion detection system (IDS) includes attack signature profiles. Network objects of a network are assigned a set of attack signature profile. A monitoring device monitors network traffic for data addressed to the network objects. A virtual processor executes instruction associated with the attack signature profile to determine if the packet is associated with known network violation.

The prior art Perelson et al. (US Patent NO Re.36, 417) discloses, a probabilistic method of detecting viral intrusion. A protection file is first created by generating a test string. The test string is compared to the original computer file and is kept in the event of a non-match. The protection file is created by storing a plurality of non-matching test string. In detection stage, the file to be screened for possible viral infection is compared to each of the test strings of the protection file. In the event of match between a test string and the file being screened, then a change in file being screened is detected.

However, prior arts taken singly or in combination, fail to anticipate or render the following limitation:

As per claim 2,

Generating, for each of the modified signature definition, a revised inspector instance based on the modified signature definition and the corresponding generated inspector instance.

As per claim 13,

Automatically generating, for each custom signature, executable code for detecting intrusion associated with the custom signature based on the generated executable code of an associated default signature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
